## **DETAILED ACTION**

### ***Election/Restrictions***

Claims 30-35, 38-46 are drawn to non-elected subject matter since these claims recite elements which were not claimed in the elected composition. In the Office action of 9/4/2003 applicant was given the opportunity to elect a specific composition which applicant did. That composition was limited to calcium ion, thrombin and organic acid. The requirement stated that applicant had to elect a specific composition, now applicant in claims 30-35 and 38-46 is attempting to add new elements/components to the already specifically elected composition. By doing so, applicant is completely changing the elected composition. This is not proper. Applicant was given the opportunity in the previous office action to elect their specific composition and that is what they did, thus the examination is limited to that specifically elected composition.

Thus, claims 9-14, 18-20, 30-35, 38-46 are withdrawn from further consideration by the examiner as being drawn to non-elected inventions.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

### ***Claim Rejections - 35 USC § 102***

Claims 15, 16, 36, 37 are rejected under 35 U.S.C. 102 (b or e) as being anticipated by JP 61171429, WO009512371, Lemole, WO 99/15121, Heimberger et al., Aoki et al. '156, Aoki et al. '050, Kim et al., or Mosesson et al.

The references each teach all of the claimed ingredients together, namely calcium ion, an organic acid and thrombin.

Applicant argued that Mosesson does not teach that there is enough thrombin in the composition to stabilize the composition. This is applicant's opinion. The composition is just that a composition. All of the claimed ingredients are there. That is all the claims require.
